DEVI[®] 

Self-limiting cable technology by Thermon[®]

Now you can benefit from the best of two worlds

The world leader in heating cable solutions joins forces with the world leader in self-limiting cable technology to bring you industrial-grade quality and performance for every application.

The best of two worlds

The partnership between DEVI and Thermon offers you a clear competitive advantage: access to the best self-limiting cables in the world via the industry's most extensive sales and support network. So whatever your needs, you can always find the right solution.

Increased flexibility for fully integrated solutions

Our aim has always been to offer you the most flexible solutions with the highest quality components and the most comprehensive supply and support network. This is why we chose to formalise our partnership with Thermon, bringing together two world leaders in their respective fields to provide you with an unmatched combination of cutting-edge technology and outstanding solutions.

Quality, reliability and service

Thermon's deep expertise in state-of-the-art conductive polymer technology is reflected in their leadership position in the strictly regulated industrial market for self-limiting cables. This expertise will further enhance DEVI's own quality and service standards, resulting in extremely reliable, easy-to-install self-limiting cable solutions.

DEVI product overview

With a choice of two different self-limiting heating cables and two connecting technologies, you have the flexibility to cost-effectively create the ideal solution for your project.

Pipe heating:

DEVI-Pipeguard™

Available in three models (10, 25 and 33W) DEVI-Pipeguard™ is a self-limiting parallel heating cable used mainly for frost protection and temperature maintenance of pipes. DEVI-Pipeguard™ prevents pipes from freezing during even the coldest winter months, avoiding time-consuming maintenance and costly repairs.

Roof and gutter heating:

DEVI-Iceguard™

DEVI-Iceguard™ is a self-limiting parallel heating cable used to melt ice and snow on roofs and in gutters and downpipes. This avoids ice damage, protects people from the risk of falling icicles and removes the need for time-consuming and potentially dangerous manual ice removal.

Connectors:

DEVIcrimp™

The DEVIcrimp™ range of connection kits includes components to cover every possible system specification, no matter how large or how complex. These rugged and easy-to-use products combine complete flexibility with years of tried and tested performance.

Connectors:

DEVI EasyConnect™

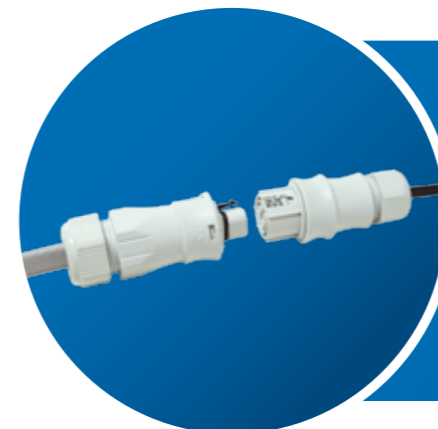

New to our range DEVI EasyConnect™ has been specially designed to provide a reliable and safe method for rapid, trouble-free installation of DEVI Thermon Technology self-limiting heating cables.

The DEVI EasyConnect™ system presents a new quick and easy way to install your heating system without compromising performance or safety.

For more information on the new DEVI EasyConnect™ products please contact your local wholesaler or visit devi.com.

DEVI know-how meets Thermon technology

DEVI EasyConnect™ main features:

- Quick and easy to install
- Safe and reliable based on proven technology
- Easy to maintain
- Flexible and adaptable modular design
- Wide range of connection combinations

DEVI and Thermon:

Your partners for the best in self-limiting heating cable solutions

A powerful partnership

DEVI has been pioneering electrical heating since the company was founded, back in 1942. Today, we are world leaders in the commercial and domestic markets for electrical heating solutions. Our extensive global sales, service and support network ensures that you are never far from a DEVI expert.

Unmatched quality

Thermon's state-of-the-art self-limiting cables are produced at their own facility in the USA under the strictest control conditions. Their longevity is legendary. In fact, Thermon was instrumental in establishing "service life" as part of the international IEEE 515.1 standard.

Solutions expertise

Both DEVI and Thermon have always taken a "solutions" approach to their businesses. This means that we look at your project as a process and a goal rather than simply a series of components, enabling us to make the best recommendations for any given challenge.

DEVI self-limiting heating cables are available through all leading wholesalers. Your local wholesaler will be pleased to give you advice about which products you need to successfully complete your project.

For more detailed advice on systems design or other technical areas, please speak to your DEVI sales professional or:
