

Data Sheet

# Danfoss Link™ RS

## Room Sensor

Application

Danfoss Link™ RS Room Sensor is an electronic sensor for measuring room temperature.

The Room Sensor is a part of the Danfoss Link™ system, which is used for wireless linking and controlling of heating systems in residential and light commercial buildings.

The Danfoss Link™ RS Room Sensor has a built-in temperature sensor, which measures the ambient temperature. It allows you to control the heating, based on room temperature in the room where installed. With the Danfoss Link™ RS you can also adjust the requested temperature.

Ordering

| Product                      | Code no.        |
|------------------------------|-----------------|
| Danfoss Link™ RS Room Sensor | <b>088L1914</b> |

Technical specifications

|  |  |
|--|--|
| Battery                                | 2 x 1.5 V AA alkaline  |
| Battery life                           | Up to 4-5 years  |
| Backlight                              | White LED  |
| Battery level                          | Indication in display  |
| Ambient temperature                    | 0° to +40° C   |
| Transmission frequency                 | 868.42 MHz   |
| Transmission range in normal buildings | Up to 30 m   |
| Transmission power Max. 1 mW           | Max. 1 mW  |
| IP class                               | 21   |
| ErP class                              |  (2%) |
| Dimensions                             | 76 mm x 76 mm x 23 mm  |
